

## Topiary Assembly Instructions

1) Topiary can arrive complete or in 2 separate pieces. If topiary arrives complete, please disregard this section.

2) Topiary will arrive with cable ties. Loop the cable tie inbetween the two sections and pull them together. TIP - Link the cable ties between a couple of wire sections for greater support.

3) Pull cable ties together and cut the excess long strip off. This can also be tucked inside the frame. If the strip has been tightened incorrectly, cut the loop and start again with a new cable tie.

4) Thread the other cable tie through the opposite side of the frame in a similar position and follow the same procedure. Frame should then be set up and ready for mossing!
